user3651476 that s because 12345678 is a valid json string
json documents have a single root node which can be null
a boolean a number a string an array or an object

yes the json format has a lot of dead space between elements
and is space insensitive in those regions so there s no reason
why you can t have single or multi line comments there
many parsers

of course the correct mime media type for json is application/json
but it s necessary to realize what type of data is expected
in your application for example i use java ext gwt and the server

jun 17 2011 the requests python module takes care of both
retrieving json data and decoding it due to its builtin json
decoder here is an example taken from the module s documentation

json.dump will write the json as string in the file
how can i get a json file that is not in the form of string
but just dictionary like is it possible

355 a json string must be double quoted according to the specs
so you don t need to escape if you have to use special character
in your json string you can escape it using character see this list

i did it many times and each time i forgot where it was menu file preferences settings i get this i want to open file settings json editable json file instead how can i do that

may 12 2021 the launch json file should be inside the vscode folder but it is not present there how can i get this file so that i can modify the configurations

oct 13 2009 ex i had one json object on each line without being wrapped in an array and it formatted the first line s object and deleted the other 2 undo ing and wrapping in the array fixed it

jq some json and you get colors as a bonus and way easier extendability addendum there is some confusion in the comments about using jq to process large json files on the one hand and having a
