user3651476 that s because 12345678 is a valid json string json documents have a single root node which can be null a boolean a number a string an array or an object

yes the json format has a lot of dead space between elements and is space insensitive in those regions so there s no reason why you can t have single or multi line comments there

of course the correct mime media type for json is application/json but it's necessary to realize what type of data is expected in your application for example i use java ext gwt and the

355 a json string must be double quoted according to the specs so you don't need to escape if you have to use special character in your json string you can escape it using character

jun 17 2011 the requests python module takes care of both retrieving json data and decoding it due to its builtin json decoder here is an example taken from the module s

i did it many times and each time i forgot where it was menu file preferences settings i get this i want to open file settings json editable json file instead how can i do that

json dump will write the json as string in the file how can i get a json file that is not in the form of string but just dictionary like is it possible

oct 13 2009 ex i had one json object on each line without being wrapped in an array and it formatted the first line's object and deleted the other 2 undo ing and wrapping in the array

may 12 2021 the launch json file should be inside the vscode folder but it is not present there how can i get this file so that i can modify the configurations

if you are reading the data from the internet instead the same techniques can generally be used with the response you get from your http api it will be a file like object however it is
