user3651476 that s because 12345678 is a valid json string
json documents have a single root node which can be null a boolean
a number a string an array or an object

yes the json format has a lot of dead space between elements and is space insensitive in those regions so there s no reason why you can t have single or multi line comments there many parsers

of course the correct mime media type for json is application/json but it s necessary to realize what type of data is expected in your application for example i use java ext gwt and the server

355 a json string must be double quoted according to the specs so you don t need to escape if you have to use special character in your json string you can escape it using character see this list

json dump will write the json as string in the file how can i get a json file that is not in the form of string but just dictionary like is it possible

jun 17 2011 the requests python module takes care of both retrieving json data and decoding it due to its builtin json decoder here is an example taken from the module s documentation

i did it many times and each time i forgot where it was menu file preferences settings i get this i want to open file settings json editable json file instead how can i do that

do standards or best practices exist for structuring json responses from an api obviously every application s data is different so that much i m not concerned with but rather the response

oct 13 2009 ex i had one json object on each line without being wrapped in an array and it formatted the first line s object and deleted the other 2 undo ing and wrapping in the array fixed it

may 12 2021 the launch json file should be inside the vscode folder but it is not present there how can i get this file so that i can modify the configurations
