karl n llewellyn was one of the founders and major figures of legal realism and his many keen insights

have a central place in American law and legal understanding. Key to Llewellyn's thinking was his conception of rules put forward in his numerous writings and most famously in his often mischaracterized declaration that they are "pretty playthings." Previously unpublished, the theory of rules is the most cogent presentation of his profound and insightful thinking about the life of rules. This book frames the development of Llewellyn's thinking and describes the difference between what rules literally prescribe and what is actually done with the gap explained by a complex array of practices, conventions, professional skills, and idiosyncrasies, most of which are devoted to achieving a law's larger purpose rather than merely following the letter of a particular rule. Edited, annotated, and with an extensive analytic introduction by leading contemporary legal scholar Frederick Schauer, this rediscovered work contains material not found elsewhere in Llewellyn's writings and will prove a valuable contribution to the existing literature on legal realism.

University of Bamberg, Language: English, Abstract: The United Nations (UN) in international relations is considered to be a supranational organization. Currently, the UN consists of 193 member states and it stresses out four main purposes which are maintaining peace and security, developing friendly relations amongst states, helping states to work together, and being a centre for harmonizing the actions of nations. The UN Org. en. about UN. Additionally, the UN is seen as a collective security system which offers states to settle down any disputes and for solving social, economic, humanitarian, and ecological problems on international level. Cf. Gareis, Varwick 2006: 85. According to this purpose, the UN has acted and authorized multilateral interventions in many states which were affected by conflicts. The Libyan conflict in 2011 as an example was one of the cases where the UN has responded to the actions and the multilateral intervention in Libya leaves questions: How does the UN shape the behavior of its member states and why does the UN act in general? The theory of social constructivism by Alexander Wendt can provide an

explanation to these questions the theory defines balances of power between states and explains the behavior of states furthermore it claims that international relations are social and the international system is constituted by ideas cf jackson sorensen 2006 162 but the main question which shall be discussed in this term paper is therefore how can the theory of social constructivism explain the actions by the united nations security council in libya first of all core assumptions of social constructivism has to be discussed in order to explain further analysis of this term paper after the illustration of the core assumptions of social constructivism the powers and functions of the un security council shall be described because the security council as one of the most important main body of the un is the only executive body that act regarding any threat of peace and security thereafter the situation in libya as the empirical example have to be mentioned what exactly happened in libya and what did the un especially the security council do altogether with the core assumptions of social constructivism the theoretical knowledge of the security council and the information of the libyan conflict the main question shall be answered at the end the conclusion shall summarize the term paper s outcome of the analysis
