received in this study one technique utilized a randomly selected population of 21 non respondents in a follow up survey 9 months after the initial contact a second technique was concerned with respondent and non respondent stratification analysis both of these techniques and their resultant findings supported the utilization of data gathered on the original questionnaire return findings indicate that programs of utah universities and colleges preparing elementary school teachers for teaching social studies are varied and different there is little uniformity among the universities and colleges regarding these programs other important findings suggest that 1 sixty per cent of the graduates completing programs of preparation in elementary education within the state of utah enroll in a social studies methods course 2 most students enrolling in a social studies methods course rate their preparation for teaching elementary school social studies as moderate or little preparation 3 university and college faculty representatives largely believe the methods courses are very greatly or greatly preparing their graduates to teach elementary school social studies 4 students and former students report areas emphasized in the social studies methods courses as centering around unit structure and related areas they also reported critical thinking as an area of emphasis 5 in the social sciences prospective elementary school teachers are completing the greatest number of hours of course work in history psychology and geography with the average student completing less than 15 hours of course work in any one of the following disciplines of anthropology philosophy general social science and economics and 6 students and former students believe courses best preparing them for teaching social studies to be those social science courses in which they complete the most hours of course work it is concluded that the staff of the department or division of elementary education at each of the six institutions of higher learning within the state is primarily responsible for determining the program for preparing elementary school teachers for teaching social studies such changes as determined desirable by these groups would therefore seem possible with little opposition or difficulty in implementation
